If these characteristics fit you, learning about Dabrowski's theory will change your life. What better way to learn than from major experts who have studied the theory for decades?

You will find your peeps at the Dabrowski Congress. It's an intimate gathering of people who care about the things you do, who are passionate about the inner world of the individual, who want to make a difference in the world.

From international experts, you will learn how the theory is being used all over the world. Stimulating conversations are guaranteed.

I will be there and so will many of the Columbus Group members who created the definition of giftedness as asynchronous development.
